Our commitment to cleaner oceans

Upstream

We endeavored to create a beautiful spa toilet that not only reduces paper waste and water usage, but also substitutes Styrofoam and plastic packaging.

In a further effort to help create a cleaner world, we have also partnered with Upstream® as an official business sponsor.

Upstream is a US-based non-profit and leading change agency for the reuse movement in the US and Canada. They accelerate the transition from our current throw-away economy to one that is regenerative, circular and equitable by normalizing reuse, growing and supporting the reuse industry, and creating an enabling policy environment for reuse.

Water-efficient

Ressa's pre-mist function and two-step flushing system reduces the need for residual flushing and consumes less water.

Responsible Packaging

All Styrofoam packaging — typically used by other manufacturers — has been eliminated and replaced with recycled "honeycomb" cardboard.

Paying it Forward

By supporting **Upstream** in their efforts to eliminate plastic pollution, we can all enjoy a cleaner, waste-free future.
